(TN3M6PGIPOESW)
60W/48VDC**

OVERVIEW

The TN3M6PGIPOESW is a full Gigabit e network managed industrial PoE switch. It has 4*10/100/1000Base-T adaptive RJ45 ports and 2*100/1000Base-X SFP fiber ports. Port 1-4 support IEEE802.3af/at PoE standard. Single-port PoE power up to 30W. As a PoE power supply device, it can automatically detect and recognize power-compliant devices that meet the standard and supply power through the network cable. It can supply power to POE terminal equipment such as wireless AP, webcam, VoIP, industrial sensor through the network cable, and meet the network environment that needs high-density PoE power supply. It is suitable for intelligent transportation, rail transit, power industry, mining, petroleum, Industrial scenes such as shipping, metallurgy, and green energy construction form a cost-effective, stable and reliable communication network.

TN3M6PGIPOESW can support the NMS management platform and cloud management APP management. It can realize security network topology management, link aggregation, port management, POE management, remote operation and maintenance and other functions. This series of switches has high reliability, is easy to install and maintain, has fast switching function, and multiple access ports, which are suitable for access to LAN devices of various scales.

FEATURE

Gigabit Access, SFP fiber Port Uplink

- Support non-blocking wire-speed forwarding.
- Support full-duplex based on IEEE802.3x and half-duplex based on Backpressure.
- Support Gigabit Ethernet port and Gigabit SFP port combination, which enables users to flexibly build networking to meet the needs of various scenarios.

Intelligent PoE Power Supply

- IEEE802.3af/at PoE standard, without damaging non-PoE devices.
- PoE network management, realize PoE port power allocation, priority setting, port power status viewing, time scheduling, etc.
- 4*10/100/1000Base-T RJ45 ports can support POE power supply to meet the needs of security monitoring, teleconferencing system, wireless coverage, and other scenarios.

Extreme Optimization, Minimalist Application

- Real-time fault alarm and fault location.
- Remote upgrade, remote restart, and factory reset. Local platform, cloud platform and mobile APP operation and maintenance management.
- Visualized network topology management, VLAN division, QoS, link aggregation, Ring network management, port mirroring, port control and bandwidth management.

- According to the application requirements of the industry, we have abandoned the complicated network management configuration while retaining the practical network management functions. Through the operation and maintenance platform, network deployment and centralized operation and maintenance can be quickly realized.

Stable and Reliable

- CCC, CE, FCC, RoHS.
- Low power consumption, No fan design, aluminum shell.
- The user-friendly panel can show the device status through the LED indicator of PWR, SYS, Link, L/A.
